Dear Mr Wright

Leicestershire and Leicester Waste and Minerals Development Frameworks Core Strategy and Development Control Policies documents

Thank you for consulting Derbyshire County Council on the framework documents.

The comments of Derbyshire County Council on the documents are:

1. The County Council raises the following objection to the Leicestershire & Leicester Waste Core Strategy and Development Control Policies Development Plan Document.

The development plan document does not adequately reflect Derbyshire County Council's comment on the Preferred Options. Derbyshire County Council noted that there were insufficient materials to enable adequate restoration of minerals extraction sites in the Trent Valley and that the Leicestershire Waste Framework should encourage cross-boundary movement of waste for such purposes, rather than resorting to landfill within the Leicestershire framework area.

Therefore, Derbyshire County Council requests that the following change be made to the Waste Core Strategy: in Policy CS 8 (iii), the phrase "or minerals extraction sites" be inserted after "restoration of existing waste disposal sites".

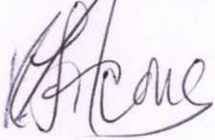

Ian Stephenson
Strategic Director Environmental Services
www.derbyshire.gov.uk

2. The County Council raises no other objections to the submission development plan documents.

I attach a copy of the Report to the Cabinet Member, who endorsed the recommendations on 18 July 2008.

Yours sincerely

Ken Acons
Principal Planner
Minerals and Waste Development Framework Team
