

To Whom It May Concern:

I have tried to read the enclosed information and I have gone online to try to gain an understating of what the hell these polices mean to me in my local. Unfortunately I do not have a legal degree and I find I am unable to plough through documents of 200 pages.

Unless you are going to issue these documents in a form whereby the "average Joe" can at least gain a modicum of understanding then why bother going to the charade and expense of trying to consult with the general public. To most people, myself included, find it incomprehensible garbage, ironic when you think what it's trying to do.

Should you require more space than that provided then please either photocopy this form, go to our website (add web address) and print off a form or attach a sheet to this form.

Please indicate to which document your comments apply using the numbering system for the documents below.

1. Minerals Spatial Strategy
2. Waste Spatial Strategy

Document to which

Comment

1) The existing sand + gravel extraction in Leicestershire is to quite a degree unobtrusive + I feel extension to the existing undertakings are preferable to new quarry workings.

2) The use of recycling must be more widely used in the future + the County Council should be more diligent in policing this.

I feel using waste to create energy for local use has to be the way forward. Landfill is expensive + not necessary. Incineration is my preference + there are plenty of sites in the county which would be unobtrusive to the eye.
