

JOINT AREA REVIEW

Partnership Working; Improving Children and Young People's Services

The recent assessment of local children and young people's services found that Leicestershire's capacity to improve was outstanding with;

- The partnership having an impressive record of securing improvements in priority areas
- Only two other county councils spending less per head on services in 2006. Good outcomes are achieved despite comparatively low levels of funding
- A high level of trust, shared goals and very good collaborative working at all levels
- Children and young people integral in developing the council's ambitions
