Subject: Minerals and Waste Submission Core Strategies

Dear Sirs

Melton Borough Council considered the Minerals and Waste Core Strategies at the Melton Local Development Framework Task Group on 23 July 2008.

At this time we have no comments to make on either of the Core Strategies. However, Members have asked me to reiterate to you this authority's objections to the proposed integrated waste management facility at Brooksby Quarry for reasons of Nuisance arising from dust, odour and birds; and Hydrological impact, subject to further information on water levels.

Regards

David Pendle
