

**LEICESTERSHIRE
MINERALS DEVELOPMENT FRAMEWORK**

**CORE STRATEGY &
DEVELOPMENT CONTROL POLICIES**

**HEARING AGENDA
MONITORING**

Whether there are clear arrangements for managing and monitoring the delivery of the strategy.

1. Are there likely to be new or amended objectives that will need to be monitored?
2. As a basis for effective monitoring, does the DPD provide sufficient information on how an adequate and steady supply of minerals is to be maintained?
3. Are there date specific targets where appropriate?
4. Are the key targets set out in the body of the DPD and are the monitoring provisions consistent with those targets?
5. Is it clear what action will be taken if the targets are not met (many are "monitor only")? Are there (should there be) contingency plans within the strategy that would be triggered if key targets are not met?
6. How is the effectiveness of Policy CS13 (Charnwood Forest) to be secured? [CBC]
7. In respect of new aggregate recycling facilities, how has the target of 75% been arrived at?
8. In respect of the number of new sites with restoration proposals to priority after uses, how has the target of 50% been arrived at?
9. Are the monitoring provisions easy to follow given the grouping of policies and objectives and the wrapping of new sections onto different pages?

Anticipated participants:
